PROFESSIONAL SUMMARY

Computer Science (AI & Data Science) graduate with proven proficiency in Python programming and hands-on experience building custom software solutions across full-stack web applications, deep learning pipelines, and backend systems. Skilled in writing clean, maintainable, and efficient Python code with strong understanding of the software development lifecycle, Agile methodologies, and version control systems. Experienced in software testing, debugging, and cross-functional collaboration to design and deliver scalable, high-performing solutions tailored to specific business needs. Holds NPTEL certification in Python and a Motion Cut Python Programming internship credential. Eager to contribute as a Custom Software Engineer at Accenture.

TECHNICAL SKILLS

Primary Language (NumPy, OpenCV)	: Python (Programming Language) — OOP, File I/O, Data Structures, Automation, ML/DL libraries
Other Languages	: Java (Core — OOP, Collections, Multithreading), JavaScript, SQL, C (Basic)
Frameworks	: Django, React.js, Node.js (Basic), Django REST Framework
Software Dev	: Custom Software Solutions, Full-Stack Apps, CRUD Modules, REST APIs, Backend Systems
Databases	: PostgreSQL, MySQL, SQLite — CRUD, Joins, Indexing
Version Control	: Git, GitHub, VS Code, Postman, Linux (Basic)
Methodologies	: SDLC, Agile, CI/CD, Software Testing & Debugging
Soft Skills	: Problem Solving, Analytical Thinking, Team Collaboration, Knowledge Sharing, Adaptability

INTERNSHIP EXPERIENCE

Java & Python Developer Intern | Strydo Technologies Pvt Ltd, India

Nov 2023 – Jan 2024

- Developed and maintained custom software modules using Java and Python — writing clean, maintainable, and efficient code to support reliable backend functionality across business applications.
- Designed and optimised SQL-based CRUD operations with advanced query techniques (joins, indexing) to improve data retrieval speed and system performance.
- Collaborated with a 4-member Agile team to understand project requirements and contribute to solution design, participating in problem-solving discussions and iterative development cycles.
- Assisted in testing and debugging software components — identifying root causes, documenting fixes, and ensuring functionality and performance met quality standards.
- Contributed to documentation and knowledge sharing within the team, maintaining internal records of debugging steps and resolution procedures to foster a collaborative development environment.

PROJECT EXPERIENCE

Grocery Billing & Management System

Custom Full-Stack Python/Django Application (Solo)

May 2025 – Jun 2025

- Developed a custom Python/Django software solution — designing, coding, and enhancing components for product catalog, cart, billing, order management, and inventory workflows tailored to specific business requirements.
- Wrote clean, maintainable, and efficient Python code for structured CRUD modules and Django views, integrating HTML/CSS frontend templates for smooth, scalable end-user experience.
- Applied modern Python development frameworks (Django) with Agile practices to deliver a high-performing, scalable application — directly aligned with Accenture's Custom Software Engineering role requirements.
- Configured admin controls, performed end-to-end testing and debugging, and documented solution architecture to support knowledge sharing and operational continuity within the project.

Deepfake Video Detection | Python-Based AI & Deep Learning System (Team of 5)

Dec 2024 – Mar 2025

- Built a custom Python software solution for deepfake video detection — designing data processing pipelines, coding CNN/LSTM model components, and enhancing classification accuracy through iterative development.

- Wrote efficient Python code leveraging deep learning libraries to process large video datasets, extract temporal-spatial features, and automate frame analysis — demonstrating advanced Python programming proficiency.
- Collaborated cross-functionally with a 5-member team to understand system requirements, contribute to solution design, and deliver a scalable, high-performing AI pipeline through Agile practices.
- Conducted performance benchmarking, software testing, and model debugging — identifying bottlenecks, refining logic, and contributing to documentation and team knowledge sharing throughout the project lifecycle.

EDUCATION

B.Tech — Computer Science & Engineering (AI & Data Science)	2021 – 2025
Siddharth Institute of Engineering & Technology, Puttur GPA: 8.44 / 10.0	
Intermediate (MPC) Sri Chaitanya Junior College	2019 – 2021
GPA: 9.5 / 10.0	

CERTIFICATIONS

- The Joy of Computing Using Python — NPTEL Online Certification (Jul 2023) ★ Python-specific
- Python Programming Intern — Motion Cut (Oct 2023) ★ Python-specific
- Management: Becoming an Effective Leader — DOANEX-EDX (Apr 2024)

ADDITIONAL INFORMATION

- 0–2 years experience bracket — B.Tech 2025 fresher with 3-month Java/Python internship; fully meets Accenture's experience and educational qualification criteria (15 years full-time education).
- Dual Python credentials (NPTEL certification + Motion Cut internship) demonstrate focused, consistent investment in Python as a primary programming language.
- Strong passion for custom software engineering, scalable solution design, and continuous learning — aligned with Accenture's innovation-driven, people-first engineering culture.
- Multilingual (English, Telugu, Hindi) with strong communication skills; comfortable working in diverse, cross-functional teams and contributing to collaborative knowledge-sharing environments.
- Available for full-time, in-person work at Accenture; open to pan-India relocation as required.
