PROFESSIONAL SUMMARY

Computer Science (AI & Data Science) graduate (2025) with hands-on experience in Python, SQL, Java, and Full Stack Development. Strong understanding of data structures, database management, data processing, and software development principles. Experienced in building database-driven applications, developing backend modules, and working with large datasets through academic projects and internships. Familiar with cloud computing concepts, AWS fundamentals, and data engineering workflows. Eager to contribute and grow as a Data Engineer.

TECHNICAL SKILLS

Programming	Java (Core — OOP, Collections, Exception Handling, Multithreading), Python, JavaScript, SQL
Frameworks & Libraries	Django (REST), React.js
Data Engineering & Analytics	Data Cleaning, Data Processing, ETL Concepts, Data Analysis
Cloud & Big Data	AWS Fundamentals , Azure Fundamentals, Apache Spark (Basic Knowledge), Databricks (Basic Knowledge)
Database Management	MySQL, PostgreSQL, SQLite — CRUD, Joins, Indexing, Data Modeling
Web Technologies	HTML5, CSS3, Django Templates
Tools	Git, GitHub, VS Code, Linux Basics, Postman
Methodologies	SDLC, Agile, CI/CD Fundamentals, Application Configuration & Deployment
Soft Skills	Problem Solving, Analytical Thinking, Cross-functional Collaboration, Adaptability, Communication

INTERNSHIP EXPERIENCE

Java Application Developer Intern | *Strydo Technologies Pvt Ltd, India* Nov 2023 — Jan 2024

- Developed backend modules using Java and SQL for efficient data storage and retrieval.
- Designed and optimized SQL queries, joins, and database operations to improve application performance.
- Worked with structured data processing and CRUD operations across relational databases.
- Collaborated with team members in Agile development environments.
- Participated in testing, debugging, and performance optimization activities.

PROJECT EXPERIENCE

Grocery Billing & Management System | *Full-Stack Django + PostgreSQL (Solo)* May 2025 — Jun 2025

- Designed and managed PostgreSQL database schemas for product, customer, and billing data.
- Developed data processing workflows for billing calculations and inventory management.
- Implemented SQL queries and database optimization techniques for faster data retrieval.
- Built automated reporting features for transaction and sales records.

Deepfake Video Detection | *CNN + LSTM + Attention Mechanism (Team of 5)* Dec 2024 — Mar 2025

- Processed and analyzed large video datasets using Python.
- Performed data preprocessing, feature extraction, and dataset balancing techniques.
- Built automated pipelines for data preparation and model training.
- Worked with large-scale datasets to improve model performance and accuracy.

EDUCATION

B.Tech — Computer Science & Engineering (AI & DS) | *Siddharth Institute of Engineering & Technology, Puttur* 2021 — 2025

GPA: 8.44 / 10 | 15 years of full-time formal education fulfilled

Intermediate (MPC) | *Sri Chaitanya Junior College*

2019 — 2021

GPA: 9.5 / 10

SSC (High School) | *Keshava Reddy School*

2018 — 2019

GPA: 9.5 / 10

CERTIFICATIONS

- The Joy of Computing Using Python — NPTEL Online Certification (Jul 2023)
- Python Programming Intern — Motion Cut (Oct 2023)
- Management: Becoming an Effective Leader — DOANEX-EDX (Apr 2024)

ADDITIONAL INFORMATION

- Strong interest in enterprise application development and business process automation; actively pursuing knowledge of SAP technologies and ERP ecosystems.
- Quick learner — demonstrated ability to acquire and apply new frameworks independently through internship and project delivery.
- Open to relocation across India; comfortable working in large, cross-functional enterprise environments.
- Developing Japanese language skills to support business communication in multilingual enterprise environments.
