PROFESSIONAL SUMMARY

Computer Science (AI & Data Science) graduate (B.Tech 2025) with a strong foundation in software development, object-oriented programming, and database systems. Experienced in building and testing database-driven applications through internship and academic project work, following SDLC and Agile practices. Skilled in debugging, code quality, and cross-functional collaboration, with a quick learning ability and strong communication skills.

TECHNICAL SKILLS

- Programming Languages: Java (Core), Python, JavaScript, C, C++, SQL
- Software Development: OOP, Data Structures, DBMS, REST APIs, CRUD Operations
- Development Methodologies: SDLC, STLC, Agile
- Databases: MySQL, SQLite, PostgreSQL — CRUD, Joins, Indexing
- Tools & Version Control: Git, GitHub, VS Code, Postman, MS Excel
- Operating Systems: Windows, Linux Basics
- Soft Skills: Communication, Problem Solving, Analytical Thinking, Teamwork, Adaptability

INTERNSHIP EXPERIENCE

Java Developer Intern

Nov 2023 — Jan 2024

- Developed and maintained backend modules using Java and SQL to support business workflows.
- Worked extensively with relational databases, data validation, and CRUD operations.
- Optimized SQL queries to improve data retrieval and reporting efficiency.
- Collaborated with development teams following Agile methodology, participating in sprint planning and code reviews.
- Performed testing and troubleshooting activities to ensure data accuracy and application reliability.

PROJECT EXPERIENCE

Grocery Billing & Management System — Full-Stack Web Application (Solo) May 2025 — Jun 2025

- Designed and built a full-stack application using Django, PostgreSQL, and React.js to manage inventory, billing, and order workflows.
- Implemented relational database schema design and CRUD operations for products, inventory, and customer transactions.
- Built REST APIs to connect the front-end and back-end layers of the application.
- Generated invoices and transaction reports using SQL-based reporting logic.
- Tested application functionality end-to-end and debugged issues across the stack.

Deepfake Video Detection System (Team of 5)

Dec 2024 — Mar 2025

- Built a deepfake detection system in Python using CNN, LSTM, and Attention Mechanisms.
- Developed data preprocessing and model evaluation pipelines for video analysis.
- Validated model outputs, analyzed performance metrics, and debugged prediction issues.
- Conducted structured testing and benchmarking to improve accuracy and reliability.
- Collaborated with a 5-person team through development, testing, and optimization cycles.

EDUCATION

B.Tech — Computer Science & Engineering (AI & DS)

2021 — 2025

Siddharth Institute of Engineering & Technology, Puttur | GPA: 8.44/10

Intermediate (MPC)

2019 — 2021

Sri Chaitanya Junior College | GPA: 9.5/10

CERTIFICATIONS

- The Joy of Computing Using Python — NPTEL Online Certification (Jul 2023)
- Python Programming Intern — Motion Cut (Oct 2023)

- Management: Becoming an Effective Leader — DOANEX-EDX (Apr 2024)

RELEVANT COURSEWORK

- Database Management Systems
- Object-Oriented Programming
- Software Engineering & SDLC
- Data Structures & Algorithms
- Management Information Systems
